

Capstone: Sauce & Spoon Tablet Rollout Project

Project Scenario

In this imagined scenario, a small restaurant chain called Sauce and Spoon wants to meet their annual growth and expansion goals. As one way to meet these goals, they have decided to launch a pilot project to test out the impact of installing new tabletop menu tablets. The company just hired Peta as their first in-house project manager to oversee the tablet rollout at two of the restaurant chain's five locations. You'll observe Peta as she guides her team through planning and executing the project deliverables. You'll get to follow the project through its life cycle: identifying project requirements, negotiating with stakeholders, creating common project documents and working to complete this project in scope, on time, and within budget.

Skills Demonstrated

- Interviewing Skills, Project Management, Communication Strategies, Project Documentation, Problem Solving, Milestones (Project Management), Requirements Analysis, Performance Reporting, Quality Management, Stakeholder Management, Stakeholder Analysis, Negotiation, Project Scoping, Project Planning

Tools Used

- Asana
- Google Workspace with AI

Summary

This project used structured management and data-driven evaluation to boost customer satisfaction to 86%, increase daily guest count by 10%, reduce wait times by 30 mins, and grow sales over 20%.

Solution

The solution achieved objectives by using tablets to boost customer satisfaction (86%), increase guest count (10%), cut wait times (30 mins), and reduce food waste (50%), driving over 20% sales growth.

Approach

Project steps: Defined goals, scope, and budget. Sourced and installed tablets, integrating them with existing systems. Trained all staff comprehensively. Launched a pilot to gather customer feedback, then implemented iterative improvements. Evaluated impact against quality standards and communicated results.
